C. GENERAL REQUIREMENTS AND RESTRICTIONS.

III. BUILDING CODE

1. **Compliance:** Use of Lots and the construction of Improvements on Lots must comply with all applicable Governmental Requirements. The Building Code does not replace Governmental Requirements and compliance with all applicable Governmental Requirements is the sole responsibility of a Lot Owner. Approval of Improvement plans by the Board of Directors and the issuance of a Beaver Lake Building Permit does not constitute assurance that Improvements comply with applicable Governmental Requirements or that permits or approvals are not also required from applicable governmental authorities.

2. **Grandfathering:** Projects completed in compliance with the Code existing at the time construction was completed will remain in compliance. Structures which are rebuilt by more than 50% must be compliant with the current Building Codes.

3. **Lot Owner's Responsibilities:** In making Improvements to Lots, Lot Owners are responsible for locating all setback lines, water, sanitary sewer, storm sewer, gas, electrical, cable television, telephone, fiber optics or other utility lines and easements relating to such utilities. Lot Owners shall not construct any Improvements over such easements without the consent of the utility involved (in the case of water or sanitary sewer, the consent of the association) and Lot Owners will be responsible for any damage to utility lines. The issuance of a Beaver Lake Building Permit and/or the approval of Improvement plans by the Board of Directors or Building Inspector does not constitute assurance that Improvements comply with applicable setback requirements and do not encroach on easements or other Lots, interfere with utilities, or that access to utilities is available.

4. **Construction Cleanup:** All trash, debris and construction materials which are not used in the construction of Improvements shall be promptly removed from a Lot by the Lot Owner. Waste, refuse or litter shall not be permitted to enter the Lake or any water impounded in the Beaver Lake Subdivision, and no individual drain field or other disposal system shall be allowed within 50 feet of the normal water line thereof.

5. **Utility Connections:** All plumbing facilities shall be connected to the central water and sanitary sewer systems serving the Beaver Lake Subdivision. Water and sanitary sewer lines shall not be placed in the same trench and there shall be a minimum of six (6) feet vertical or four (4) feet horizontal separation between the lines. In addition, water and sanitary sewer lines shall comply with applicable Governmental Requirements. The Lot Owner shall be responsible to pay all connection and other fees relating to the water and sanitary sewer systems provided for in the Construction Fee Schedule.

In addition, all Beaver Lake Association homes are recommended to have a working sewage backflow prevention device located between the main sewer line and the house or the owner will assume the responsibility of flood damage inside the home should there be a sewer system malfunction. All newly constructed homes are required to have a backflow device before the house is connected to the system.

6. **Utility Work:** All work relating to connections to the water and sanitary sewer systems serving the Beaver Lake Subdivision (including, but not limited to, any cuts in or

III. BUILDING CODE

tunneling under Beaver Lake roads) shall be performed or supervised by the association. In addition, the Lot Owner shall notify the association in writing prior to any other utility provider connecting or providing access to a utility. The association shall instruct such utility provider whether to tunnel under or cut a Beaver Lake road. The association shall supervise all utility work performed by other utility providers. All work performed by other utility providers shall be performed in a workmanlike manner which minimizes damage to Beaver Lake roads, common areas and neighboring Lots. A Lot Owner shall be required to obtain a Beaver Lake Building Permit and pay the applicable Beaver Lake Building Permit fee prior to the commencement of any work. In addition, the then current charge will be assessed for the time spent by association personnel for the supervision of the work of a utility provider as provided for in the Construction Fee Schedule.

7. **Utility Damage:** A Lot Owner responsible for cutting into, damaging or breaking an association water or sanitary sewer line shall be liable to the association for all expenses related to the repair of such damage. The Lot Owner shall promptly notify the association of any such damage. All damage shall be repaired by the association, and the association shall bill the Lot Owner for the actual cost to repair such damage. The Lot Owner shall also be liable for any liquidated damages provided for in the Beaver Lake Association Liquidated Damages Schedule.

8. **Construction Damage:** If, during any construction for a property owner, the roads or other properties are damaged by the contractors, cement trucks, delivery trucks, grading equipment, etc., it shall be the responsibility of the property owner to have them repaired to their original condition. If the Beaver Lake Association believes that, for the safety of other property owners, said road or properties must be repaired immediately, the property owner will be given written notice of such. If the roads or property are not satisfactorily repaired within the shortest possible time, in accordance with road and weather conditions, the association will contract to have them repaired and will demand payment from the property owner. If payment is not made, appropriate legal action will be taken to satisfy the claim. In cases where weather conditions do not allow immediate permanent repair, the property owner will make the best possible temporary repairs until conditions allow permanent repairs to be made by him. No temporary or insufficient repair shall excuse the property owner from ongoing responsibility for total and permanent repair and restoration of such damaged roads or properties.

9. **Construction Deposits:** When the use of heavy equipment (including skid loaders) in excavating or construction is to be used, a deposit shall be required to ensure that any damage resulting in such construction is repaired by the responsible party or fines due to a Covenant violation is paid. The deposit will be cashed and held until construction is complete. Refunds will be returned within two weeks after the building inspector has verified that all construction requirements are in compliance with the Beaver Lake Handbook and there is no damage to Beaver Lake property or outstanding fines. See the Construction Fee Schedule for applicable projects which may require a construction deposit.

10. **Hydrants:** A frost-free hydrant being used on a Lot shall have its own meter whether or not the Lot is subsequently improved.

III. BUILDING CODE

11. **Temporary Entrances:** To be consistent with Cass County regulations, there shall be no temporary entry to any substantially completed Dwelling. Dwellings must have a permanent stoop, porch, veranda, landing, deck or similar structure. Temporary concrete, wood or steel steps are prohibited.

12. **Pole Constructions:** There shall be no pole barn type construction, including open pier/pole foundations, on Residential Lots in the Beaver Lake Subdivision. Such type construction on other types of Lots may be authorized at the discretion of the Board of Directors.

13. **Combining Lots:** The association has reserved certain easements as provided for in the Covenants and Restrictions. A Lot Owner owning contiguous Lots may build a Dwelling on a Residential Lot, Equestrian Lot or Mobile Home Lot or a Commercial Building on a Commercial Lot over the common Lot lines between such Lots and the easement located between such Lots shall be inoperative if such easement is then not in use. However, before commencing construction of a Dwelling on a Residential Lot, Equestrian Lot or Mobile Home Lot or a Commercial Building on a Commercial Lot, the Lot Owner must replat the contiguous Lots into one Lot, and the Lot Owner must execute a Replatting Agreement wherein such Lot Owner agrees that the contiguous Lots replatted into one (1) Lot shall, from the date the replatting is effective and continuing thereafter, require annual membership fees equal to the number of Lots replatted into one (1) Lot. Such replatting must also comply with applicable Governmental Requirements.

14. **Separating Lots:** Separating replatted or previously homesteaded lots is allowed to their originally surveyed lot lines providing they meet the single lot restrictions contained in the Code. For homesteaded lots, past membership fees must be paid according to the Homestead Resolution, Section VIII. Membership fees are due for each lot after the separation.

15. **Building Construction Restrictions:** The following general restrictions apply to all lots and dwellings:

a. Not more than one single family dwelling may be erected or constructed on any one lot, except for those lots so designated.

b. No permanent structure may be erected on any lot prior to the erection of a dwelling except a tool shed, sea wall, gazebo, dock, fence, retaining wall, walkway and stairs. Such structures may be limited in size.

c. No accessory or temporary building, or basement shall be used or occupied as living quarters.

e. No recreational vehicles, temporary tents, or other similar structures shall be

III. BUILDING CODE

erected, moved to, or placed upon said premises except where a permanent dwelling exists.

g. No permanent roofed structure of any kind shall be permitted within fifty (50) feet of the Lake with the exception of a Boathouse.

h. Due to noise and offensive fume pollution, gas powered generators will not be used during construction unless there is a power outage.

i. Overhangs, except for soffits and porches as identified in paragraph F, shall not protrude into any setback without a variance. Soffits may extend into the setback by no more than 2'.

j. Insofar as possible, construction material will not be deposited on Beaver Lake roads. If material will be deposited on Beaver Lake roads, permission must first be obtained from the Building Inspector or Beaver Lake representative. The building inspector or Beaver Lake representative may grant road blockage exceptions for extenuating circumstances as deemed appropriate. If the only option is to temporarily deposit construction material on Beaver Lake roads, warning indicators must be used on both sides of the material as a warning to traffic; no more than half of the roadway will be blocked; and those materials must be completely removed and the surface cleaned before 4:00 p.m. the day of delivery. If more than half of the roadway is blocked the material must be removed immediately. Equipment must not block more than half the roadway; warning indicators must be used on both sides of the equipment as a warning to traffic; and the equipment must be moved completely off the roadway at the end of the workday. Equipment blocking more than half the road will be removed immediately. The Building Inspector or Beaver Lake representative shall determine the extent of blocked roadway. Violations to these restrictions will be subject to Liquidated Damages defined in the Liquidated Damage Schedule, Section VI, Miscellaneous, paragraph C.

k. Use of road right of way: During any construction project on a lot, the road right of way may be used under the following conditions. The property owner or property owner's contractor must receive permission to place building materials, equipment or vehicles on the road right of way. Any materials, equipment, or vehicles placed in the road right of way must have orange warning indicators placed on the edge of the street on the approach to the material and along the material to warn other motorists of a potential hazard. Any materials, equipment, or vehicles anticipated to be in the road right of way for more than 5 days must place warning barricades with yellow warning night lights at least 15' in advance of the area for continual notice of a potential hazard. After the project completion the area affected on the road right of way must be graded, seeded, and a straw mat placed for restoration purposes. This area shall be repaired to the satisfaction of the Association representative. Violations to these restrictions will be subject to Liquidated damages defined in the Liquidated Damage Schedule, Section VI, Miscellaneous, paragraph C.

III. BUILDING CODE

D. BUILDING PERMITS

1. Only Lot Owners in good standing can be issued a building permit. In addition to any Governmental Requirements, including, without limitation, building or similar permits required by or from any governmental authority, each Lot Owner shall apply for a Beaver Lake Building Permit from the Board of Directors prior to commencing any Improvement to a Lot.

2. A single permit may be issued for multiple improvements so long as they are considered one project. In such a case, fees and timelines for the most expensive improvement will be charged. Improvements requiring a Beaver Lake Building Permit include, but are not limited to, the following.

After that, a new permit must be issued. See paragraph “U” of the Building Code for time limits of completing construction.

E. BUILDING PERMIT APPLICATION PROCESS

1. **Submit Application:** Once the requester has been determined by the Building Inspector to be a member in good standing, coordination should be accomplished to determine the information required to submit an application for a Building Permit. Building Inspector hours of operation are established and available at the Association Office. The set of materials needed, exemplified below, are dependent on the size and type of construction being requested and do not necessarily have to be professionally prepared by an architect, surveyor, landscape architect or draftsman unless the improvement is the construction of a Dwelling or Commercial Building, an addition to a Dwelling or Commercial Building. One copy of the application materials shall be submitted to the Building Inspector and kept as the official record of the project.

- a. Address of the Lot, name and address of the Lot Owner and a phone number where the Lot Owner can be reached during business hours.
- b. Plot plan, drawn to scale, showing the relative position of the structure on the lot
- c. Blue prints, signed and dated
- d. Certified survey.
- e. Statement that construction is built to IRC or IBC standards
- f. Assurance that silt fences will be used to contain erosion during construction
- g. Construction deposit
- h. Utility fees
- i. Confirmation that requester is a member in good standing (Building Inspector)
- j. For Commercial constructions, specifications showing the building size, building height, location Lot, exterior building materials, exterior building design, parking layout, number of parking spaces, landscaping, and signage are required.

III. BUILDING CODE

Building Inspector at the site and if the stakes are per the plot plan and all other requirements are met, the permit will be issued when payment is received.

1. Statement indicating where construction materials and equipment will be located.

2. **Application Review:** The Building Inspector will act on applications for Beaver Lake Building Permits in the order complete applications are received.

3. **Board Action:** Special applications or variances must come to the Board of Directors through the Appeals Committee for approval. Such applications are submitted to the Board and reviewed at the monthly scheduled Board meeting. The requestor is encouraged to attend the meeting to support the request.

4. **Issue Building Permit:** When the Building Inspector determines that all information is available and the design is in compliance of all Beaver Lake Codes and Covenants, or has a waiver or variance approved by the Board of Directors, the Building Inspector will issue a Beaver Lake Building Permit and collect construction deposits and utility fees as appropriate. Building permits are good for 1 year unless a separate Cass County permit is required. In that case, the more restrictive time limit prevails. Construction must start within that time or the permit is no longer valid. The construction must be completed within the time limit assigned in the Construction Fee Schedule.

Non-conforming existing structures may receive a building permit to refurbish or repair provided, however that the structure complies with the guidelines required and existing in force and effect at the time the original application for construction was approved. Additionally, all CURRENT regulations concerning the County standards must be adhered with.

New structures, never existing prior to the application must comply with current Beaver Lake Association By-Laws and CURRENT County regulations.

Pre-existing structures such as Boat Houses, Boat Docks, Sea walls, Boat Ramps, etc. that are being rebuilt may be grand-fathered and issued a permit to rebuild providing they are rebuilt under the same guidelines as their original permit or structure and comply with the current County permits and zoning regulations. New structures, never existing prior to the application must comply with current Beaver Lake Association By-Laws and County permits and zoning at the time of the Building Permit Application.

5. **Appeals:** If the request is disapproved, the requestor may appeal to the Appeals Committee described in this document.

6. **Complete Construction:** After issuance of a Beaver Lake Building Permit, the construction shall be completed as promptly as possible in accordance with the approved plans, type of construction and times depicted in the Construction Fee Schedule. Survey flags must be left in place until all measurements required by the Building Inspector are completed. If they are not present, they must be replaced at the lot owner's expense prior to construction.

III. BUILDING CODE

7. **Extensions:** Extensions to the time limits listed in the Construction Fee Schedule may be granted by the Board of Directors. The Lot Owner must provide sufficient justification describing the unusual circumstances which caused the need for an extension.

8. **Stop Orders:** The Building Inspector shall have the right to inspect the work as it progresses. Should a noncompliance occur with setbacks or approved plans, the Building Inspector will issue a Stop Order until the lot owner brings the project back into compliance. Violators of a stop order will be subject to substantial Liquidated Damages defined in the Liquidated Damage Schedule, Section VI, Miscellaneous, paragraph A.

9. **Occupancy:** For Dwellings, an occupancy certification from Cass County must be obtained before a Dwelling can be occupied.

F. SETBACK RESTRICTIONS

This is for B, C and M lots. (A) lots, see Building codes "K" Boathouses

b. Accessory buildings that meet Building code F. 1. SETBACK RESTRICTIONS (above) have no size limits

c. Uncovered front stoops and decks may extend up to six (6) feet into the thirty (30) foot setback required at the front of the Lot with a maximum of (48) square feet allowed. Steps are not included in setback restrictions in the front or rear of house; however, step landings "between stair runs" are included. The maximum size of a landing can be forty-eight (48) sq. feet, and a maximum length of eight (8) feet when they fall within front and rear set back area. If steps and landing fall inside the ten (10) foot setback, then the maximum size of landing is twenty-four (24) square feet with a maximum of four feet into the 10 foot setback restriction for both steps and landing. To be considered a landing there must be a minimum of a seven inch drop from main deck.

III. BUILDING CODE

Windows and Fireplaces that do not require footings can extend 2ft. into setback same as Soffits. Decks are measured to the maximum extremity of the deck flooring as projected to ground level. This restriction applies to all decks attached to the main structure and to all detached structures such as garages, gazebos, etc. Refer also to paragraph III.C.15.i.

6. All setback conditions must comply with the Zoning Regulations of Cass County, Nebraska as applied to "R" Residential regulations or "A" Agricultural (perimeter).

G. EROSION CONTROL/LAND RECLAMATION

1. a. Lakefront Lot Owners shall be responsible for the maintenance, soil retention and erosion control of the shoreline abutting their Lot with the use of rock, a Sea Wall or other means approved by the Board of Directors. All shorelines and seawalls should be stabilized to withstand wake action and fluctuations in lake level from four feet below full pool to three feet above, bearing in mind that during very heavy rains lake levels may rise rapidly.

1. b. Boat lifts and docks should be sturdy enough to withstand wake action and fluctuations in lake level from four feet below full pool to three feet above. Boats in lifts should be secured to prevent boats from floating out of boatlifts during conditions that cause the lake to rise.

Boats previously registered that correctly meet the length limits but exceed the weight limits prior to December 2017 will be grandfathered under the current ownership.

- a. Pontoon Boats - 28'
- b. Power Boats - 22'
- c. Sailboats - 24'
- d. Swim Platforms – 8' by 10'

21. Boat weight is based on manufacturer specifications for hull dry weight plus maximum water ballast weight plus person/gear maximum weight. Additionally, add on water ballasts that would cause the boat to exceed the boats manufacturer's maximum capacity, designed to increase a boats ability to create a larger wave are prohibited. Boat lengths will be determined by manufacturer specifications. If manufacturer specs can't be obtained then the boat length will be determined by measuring from bow tip to the transom at the point farthest from the bow. Boat length does not include the swim platform whether it is separately attached or molded into the boat. For boats with molded platforms, the boat length will be determined by manufacturer specifications or if not available as follows:

- a. Measure the underneath side of the swim platform at the center of the boat from the stern edge of the swim platform to the transom.
- b. Subtract this measurement from the overall boat length, as determined by measuring the distance from the bow tip, excluding superstructure, to the same point on the stern edge of the swim platform used in step 1.
- c. The result is the boat length from the bow to transom.

22. Houseboats, defined as any pontoon or flat bottomed boat with sides enclosed for the purpose of providing sleeping quarters, are not allowed on Beaver Lake.

23. Speeds exceeding 5 mph/no excessive wake are illegal at all times in or within 50 yards of any vessel, harbor, marina, landing pier, fishing pier, anchorage or bathing beach.

24. It is unlawful to wake jump with a motorized vessel within 50 yards of another craft.

The Beaver Lake Security Chief has the authority to allow members to launch and test un-owned watercraft for 30 minutes providing the boat is in compliance with State and Local watercraft regulations, passes an invasive species inspection, and the member follows all Beaver Lake safety rules. The requestor should contact the Managing Director or Beaver Lake Security, in advance, to set up a time for the test.
