

Murray - Plattsmouth

On the morning of Aug. 31, 2021, an embankment failure occurred on the east approach to the viaduct on Highway 1 in Murray in an active construction zone. The highway remains closed to all traffic until further notice.

Q: When will the roadway be reopened to traffic?

A: With work continuing as weather permits, we anticipate a full opening of the viaduct to traffic by November.

Q: What are the detour routes?

A: NDOT has been working closely with local elected officials, the school, community leaders, and the railroad to identify the best routes. Official detours are the use of N-66 and US-34 between N-50 and US-34/75.

Q: What is the plan for reopening?

A: The contractor is on site working diligently to complete both repairs to the embankment as well as finish work on the roadway as part of the ongoing construction project. NDOT teammates remain on site for inspection and compliance.
